

# Give your team the edge.

Invest in your company's future.

Join the thousands of employers who have empowered their teams with in-demand skills at General Assembly.

Today's tech-driven economy demands that companies stay relevant to compete. We provide award-winning training in coding, data, business, and design to close the global skills gap and help individuals and businesses thrive. In fact, more than 40 of the Fortune 100 have maximized their talent with us.

We recognize that there is a learning path to match every schedule, lifestyle, and career goal and have developed dynamic programs that are designed for busy professionals. Develop your talent with our flexible weekday, evening, and weekend courses — both online and at our campuses worldwide.

“I told my manager I wanted to learn design and shared ways it could be helpful in my current role. My company paid for the class and now I am more confident at our design meetings. I work more effectively with designers and speak their language.”

**Shannon Winter**

Product marketing manager at Atlassian,  
Visual Design grad

# Python Programming

Start coding in Python, one of the most popular — and versatile — programming languages on the market. In this part-time course, students get hands-on experience with essential tools and techniques and discover why professionals ranging from analysts to web developers rely on Python to excel in their work.

- Design and build a custom web or data application.
- Explore special topics like data science or web development, applying Python skills to data visualization or web applications.
- Explore how Python-powered chatbots, machine learning models, and more can unveil compelling business insights and streamline workflows.

## Why Employee Education Matters

### In-Demand Skills

Today's tech-driven economy requires a dexterous workforce with a broad range of skills. Our courses in coding, data, marketing, and design are constantly revised and updated to give employees the most relevant tools they need for immediate impact on the job.

### Industry Experts

General Assembly courses are created and led by expert instructors who represent top talent in tech, data, business, and design. Our instructional team features key players at companies like Amazon, Coca-Cola, and Airbnb, and we collaborate with industry experts to craft innovative courses. Students also have direct access to thought leaders and pioneers through the classroom, special events, and guest speakers.

### Project-Based Learning

We avoid static lessons and rote exercises. Instead, GA students learn through real-world problem solving, resulting in practical hands-on experience that can be applied right to the job.

### Career Growth and Development

Support your workforce's career growth, keep your star employees sharp, and retain top talent by boosting confidence and effectiveness. By learning with GA, your employees not only advance in a field of study but also improve their ability to think strategically, work across teams, and grow leadership and communication skills.

### Flexibility and Accessibility

General Assembly courses are designed for busy working professionals. We know how to engage students after a long day by packing our lessons with the most essential concepts in a time-effective way. Your employees can skill up during daytime, evening, and weekend courses online and on campus.

## Frequently Asked Questions

---

### How are student performance and course completion measured?

General Assembly measures student progress through regular homework assignments and in-depth projects. Students are graded on a pass/fail basis. To receive a passing grade, students must:

- Receive a passing grade on 80% of all homework assignments. Homework is graded on the basis of completion. To receive a passing grade on a homework assignment, students must complete 100% of the minimum tasks specified in that assignment.
- Maintain consistent attendance. A passing grade in attendance will be given to students with no more absences than the amount allowed, which varies by program.
- Receive a passing grade on all course projects. General Assembly does not require a cumulative final test or examination for the completion of any course. A statement will be furnished to students regarding their satisfactory or unsatisfactory progress.
- Pay their tuition in full by the end of the course in order to receive a letter of completion, unless other arrangements have been made with their Admissions Producer before the course begins.

### Are you an accredited institution?

While we strive to provide a top-notch educational experience for you with excellent instructors and an enthusiastic and involved community, General Assembly is not accredited by a U.S. Department of Education-recognized accrediting body. This means that federal student loan aid cannot be used in conjunction with our courses.

General Assembly is a licensed school in every U.S. state in which we operate.

If you have any additional questions regarding accreditation, reach out to [admissions@ga.co](mailto:admissions@ga.co).

### What benefits do students receive once they complete a GA course?

A letter of completion is just the beginning. After graduation, our alumni become part of a global community whose members are invested in one another's success. We also provide the tools they need to foster lifelong learning and pursue work they love.

Our graduates gain access to a suite of digital tools, development programs, passes and packages to premiere events, and more. They are also entitled to tuition discounts on future GA courses, classes, and workshops (amounts vary by course).

### Where can I see exactly what's covered in the course?

You can find more information about GA's Python Programming course, along with a detailed syllabus, [here](#).

### How do I take the next step toward sponsoring my employee?
